## What Do Advertisements Mean To You?

Do you really appreciate what the advertisements mean to you? They are not there to flaunt this man's and that man's selfish plans for profit.

The advertisement of today is the honest merchant's or manufacturer's best method of multiplying by thousands of times an interesting message. He has learned from long experience of his own and that of others that what he has to say must prove interesting and satisfactory to you, else it were better unsaid. He has learned that his advertising will not pay him unless it tells you about the good things you really want to have.

That is why you will find it profitable to read the advertisements regularly. Perhaps you do. But read them with an appreciation of just what the development of honest, truthful advertising has meant in smoothing out some of the kinks of your daily routine.

Think how much they save you in time, steps, trouble and money in buying things you must have to live a healthy, happy, comfortable modern life.
